PROJECTS

Skin Disease Detection & Dermatologist Appointment System

- Built a CNN model using the ISIC 2019 dataset to classify multiple skin diseases from uploaded images.
- Developed an appointment booking system enabling users to consult dermatologists based on prediction.
- Implemented location-based filtering to recommend nearby dermatologists for personalized care.
- Used HTML, CSS, JavaScript, Django, APIs, PostgreSQL, and Git for full-stack development.

Loan Management & Repayment Tracking System
Live link: https://loan-agency.onrender.com/

- Built a loan management system with role-based dashboards for clients and lenders.
- Enabled loan application submission and approval workflow between clients and lenders.
- Provided lenders with full control over loans, including payment confirmations and repayment tracking.
- Developed using HTML, CSS, JavaScript, Django, PostgreSQL, and Git

Arch Edge Official Website – Interior and semi-exterior Product Showcase Website
Live link: https://archedge.pro/

- Developed a fully responsive, modern website for showcasing decorative wall panels, ceilings, and flooring products.
- Implemented interactive product displays, animations, and UI effects using HTML, CSS, and JavaScript.
- Ensured cross-device compatibility with a responsive design for an engaging user experience.
- Deployed the website on GitHub Pages, making it publicly accessible.

CERTIFICATIONS

- Received a Letter of Recommendation from ArchEdge Pvt. Ltd. for successfully designing and deploying their company website.

SOFT SKILLS

- Adaptable to new work environments and technologies
- Ability to work collaboratively in a team environment
- Analyzes challenges and provides solutions
